Boeing 737-800 Winglets

Pictured over Mt. Hood, Oregon with Mt. Rainier (l) and Mt. Adams (r) in background.

The B737-800 with winglets represents the newest addition to the Alaska Airlines family of Boeing 737 jets. This "new generation" aircraft *(N546AS)* employs the latest in flight deck technology, fuel efficiency and passenger comfort. Alaska's 737-800 passenger cabins are outfitted with all-leather seats and larger overhead storage bins. With 160 seats and fuel-saving winglets, it is the ideal size aircraft for many of Alaska's long haul markets out of the Pacific Northwest to Alaska, California and the East Coast.
